(54) Title: FLEXIBLE FOLDABLE KEYBOARD

(57) Abstract: A flexible foldable keyboard apparatus comprising a flexible foldable keyboard (101) having a key defining plane (102), an interface device and phone supporting means (103). The phone supporting means (103) is arranged to unfold from a storage configuration, in which the phone supporting means (103) is folded onto the key defining plane (102) to allow the key defining plane (102) to be wrapped around the phone supporting means (103), to present a telephone supporting configuration, in which the phone supporting means (103) is configured to receive a mobile telephone (401). The phone supporting means (103) is configured to support a mobile telephone (401) in an orientation in which an electrical connection is provided between said interface device and the electrical connectors of said mobile telephone (401), such that said mobile telephone (401) and said flexible foldable keyboard (101) are in electrical communication.
